

# SureLock for Android

## Lock down mobile devices into Kiosk Mode

**42GEARS**<sup>TM</sup>  
Mobility Systems

Businesses are adopting mobile solutions to connect with their customers, employees and users. Their objective is to increase user productivity and streamline business processes while reducing operational cost.

Companies use off-the-shelf mobile devices for business purpose as building dedicated purpose devices is expensive and time-consuming. However, these consumer devices can be easily misused and tampered with. This can cause device malfunction, loss of user productivity, and an increase in operating cost such as extensive wireless data usage.

SureLock transforms Tablets, Smartphones, Smartwatches or even desktop computers into dedicated purpose devices. Once locked down the end user has access to only “approved” applications, mobile features and settings. SureLock ensures mobile devices are used for intended business purposes only.

### Benefits for the enterprise

- ✓ Increase workforce productivity with access to only the company **approved applications**
- ✓ Reduce device maintenance and support **costs**
- ✓ Prevent **intended and unintended misuse** of mobile devices and settings
- ✓ **Password-protect** sensitive data and applications
- ✓ Maintains **native Android UI** and user experience
- ✓ **Over-the-air** (OTA) device lockdown settings
- ✓ Easy **branding** and customization of the device

### Supported Platforms

Eclair 2.x  
Froyo 2.2.x  
Gingerbread 2.3.x  
Honeycomb 3.0.x  
Ice Cream Sandwich 4.0.x  
Jelly Bean 4.1.x  
KitKat 4.4.x  
Lollipop 5.0.x  
Marshmallow 6.0.x

# SureLock for Android

## Lock down mobile devices into Kiosk Mode

**SureLock for Android** provides a comprehensive lockdown solution for tablets and mobile devices with following salient features:

### Allow execution of "approved" applications only

Prevent unauthorized access to disapproved applications on Android devices.

### Single Application Mode

Limit the device to a single application and transforms it into a purpose-specific kiosk.

### Disable Peripheral Settings

Lockdown Peripherals like Camera, GPS, Mobile Data, Wi-Fi, Bluetooth, USB, Flight Mode.

### Customization and Branding

Brand your locked device with corporate wallpapers and use customized icons and text.

### Comprehensive Application Settings

Launch application on startup, clear data, and disable selective child windows.

### Advanced Lockdown

Disable Safe Mode, Factory Reset, Disable USB Debugging, Hide Bottom Bar, Disable Notification Panel and Status Bar.

### SureLock Analytics

Get insights on the applications used and view how long they were used for.

### Driver Safety

Set threshold to disable mobile device functionality when vehicle crosses a certain speed.

### Power Saving Settings

Use inbuilt features to reduce battery consumption and save power on the device.

### Calls and Message Settings

Completely disable, blacklist or whitelist phone numbers for calls and messages.

### Import and Export Settings

Mass configure SureLock settings for quick and easy configuration.

### Compatibility with SureMDM - Mobile Device Management Solution

Use SureMDM's inbuilt option to remotely install, configure and manage SureLock.

## About 42Gears

**42Gears Mobility Systems** provides SaaS and On-premise EMM solution. It offers enterprise-ready products to help companies secure, monitor and manage enterprise mobile devices. More than **6100** customers across **105** countries use 42Gears for **BYOD** and **Company Owned Device** deployment scenarios. 42Gears products are used in verticals like healthcare, manufacturing, logistics, education and retail.
