

SureLock Kiosk Lockdown

Lock down Android devices into Kiosk Mode

Businesses are adopting mobile solutions to connect with their customers, employees and users. Their objective is to increase user productivity and streamline business processes while reducing operational costs.

Companies are saving substantial money and time by using off-the-shelf mobile devices instead of building dedicated-purpose devices. If not protected, however, off-the-shelf consumer devices can be subject to tampering and misuse. This can cause device malfunction, loss of user productivity, and an increase in operating costs, such as through extensive wireless data usage.

Why SureLock?

SureLock transforms tablets, smartphones, smartwatches, and even desktop computers into dedicated-purpose devices. Once devices are locked down, the end user can only access pre-approved applications, mobile features and settings. SureLock ensures mobile devices are used for intended business purposes only.

Key Benefits for Enterprises

- Increase workforce productivity by providing access only to company-approved applications
- Reduce device maintenance and support costs
- Prevent intentional or unintentional misuse of mobile devices and settings
- Password-protect sensitive data and applications
- Maintain native Android UI and user experience
- Configure over-the-air (OTA) device lockdown settings
- Easily brand and customize devices

Supported Platforms

- Android 4.3 onwards

Key Features

SureLock for Android provides a comprehensive lockdown solution for tablets and mobile devices with an array of useful features:

- **Approved Application Use**

Prevent unauthorized access to unapproved applications on Android devices.

- **Single Application Mode**

Limit devices to a single application and transform them into purpose-specific kiosks.

- **Disable Peripheral Settings**

Disable peripheral features, including camera, GPS, mobile data, Wi-Fi, Bluetooth, USB, and Airplane Mode.

- **Customization and Branding**

Brand your locked device with corporate wallpapers and use customized icons and text.

- **Comprehensive Application Settings**

Launch a chosen application on startup, clear data, and disable selective child windows.

- **Advanced Lockdown**

Disable Safe Mode, factory reset, USB debugging, bottom bar, notification panel, and status bar (for applicable devices).

- **SureLock Analytics**

Get insights about application use and view when and how long they were used for.

- **Driver Safety**

Set a speed threshold to disable mobile device functionality when vehicles cross a certain speed.

- **Power-Saving Settings**

Use built-in features to reduce battery consumption and save power.

- **Call and Message Settings**

Completely disable, blacklist or whitelist phone numbers for calls and messages.

- **Import and Export Settings**

Mass-configure SureLock settings on all of your devices quickly and easily.

- **Compatibility with SureMDM - 42Gears' Mobile Device Management Solution**

Use SureMDM's built-in compatibility to remotely install, configure and manage SureLock.

About 42Gears

42Gears is a leading **Unified Endpoint Management** solution provider, offering Software as a Service (SaaS) and on-premise solutions to secure, monitor and manage all business endpoints, such as tablets, phones, rugged devices, desktops, POS terminals and wearables. 42Gears products support company-owned as well as employee-owned devices across many platforms, including Android, iOS, iPadOS, Windows, macOS, Wear OS and Linux platforms.
